

Mortgage Rates Remain Flat

December 10, 2020

MCLEAN, Va., Dec. 10, 2020 (GLOBE NEWSWIRE) -- [Freddie Mac](#) (OTCQB: FMCC) today released the results of its [Primary Mortgage Market Survey \(PMMS\)](#), showing that the [30-year fixed-rate mortgage \(FRM\)](#) averaged 2.71 percent.

"Mortgage rates remain at record lows, resisting their typical correlation to Treasury yields, which have recently been moving higher," said Sam Khater, Freddie Mac's Chief Economist. "Mortgage spreads – the difference between mortgage rates and the 10-year Treasury rate – are declining from their elevated levels earlier this year. Although today's mortgage spread is about 1.8 percentage points and still has some room to move down if the 10-year Treasury continues to rise, it's encouraging to see that the spread is almost back to normal levels."
